

***** PLEASE REVIEW THIS QUESTIONNAIRE CAREFULLY PRIOR TO YOUR PETS APPOINTMENT. A STAFF MEMBER WILL GO THROUGH IT WITH YOU VERBALLY WHEN YOU ARRIVE TO DETERMINE WHAT YOUR PET NEEDS*****

Has your pet been showing any of the following symptoms in the past 7 days?

- Vomiting
- Diarrhea
- Abnormal Peeing
- Depression
- Not eating or drinking
- Discharge from eyes, nose or genitalia
- Coughing
- Sneezing
- Wheezing

Is your pet on any medications of any kind?

Do you have any other health concerns about your pet?

FOR DOGS ONLY:

Are you currently doing or are you planning on doing any of the following activities with your dog?

- Boarding
- Grooming
- Training Classes
- Dog Parks
- Being a "Social Butterfly"
- None of these

Dogs should be vaccinated against Bordetella (a.k.a. kennel cough) if their lifestyle includes any or all of the above activities. Kennel cough is a contagious disease that is most commonly spread in areas where lots of dogs spend time together but it can also be picked up from casual contact with other dogs.

FOR CATS ONLY:

What kind of lifestyle will your cat be living, both now and in the future?

- Indoor Only
- Indoor & outdoor
- Living with cats that go Outdoors
- Not Sure

Cats should be vaccinated against Feline Leukemia if they spend time outdoors, or if they live with cats that go outdoor, unless they are always supervised on a leash. Feline leukemia is a contagious disease that requires prolonged direct contact with an infected cat, making cats that go outdoors the most at risk. Kittens and young cats are more at risk than older adults.

Do you want us to provide de-worming for your pet?

Routine de-worming is highly recommended for puppies and kittens during their initial vaccine series and for adults at least once a year. The cost is 15\$ for puppies and kittens (under 4 months of age), 18-28\$ for adult cats and 22-54\$ for adult dogs, depending on weight.
